

Install econnecx™ mobile home and office automation. Create your own green smart home and have complete peace of mind as you can now control your appliances and electrical fittings from anywhere. Schedule your appliances to fit your usage and achieve real power bill savings of 10-30%. Plus so much more...

## NEWS

### COMMERCIAL BUILDINGS

Due to the simplicity of wiring and ease of use, in the **past two months econnecx™ has been confirmed in 36 commercial tenancies**. econnecx™ provides the building owners, managers and tenants **control** of heating, cooling, ventilation, signage lighting, security lighting, water heating and also offers an 'away' mode to shut down all non-essential power.

EECA estimate most building owners/tenants would **save around 25% in power** through a better energy management.

**With the implementation of econnecx, Building owners have been able to remove swipe card systems.** Building tenants access is logged via their smart phone access and these phones can also be used for after-hours access. econnecx™ will also schedule un-locking and locking of all lobby doors, tenancy doors, pedestrian gates and automatic gates. Each tenant can manage their own environment. Staff can access via a simple web interface eliminating the need and cost of subcontractors to make changes and manage systems.

### RESIDENTIAL HOMES

Now that most people own a smart phone the **demand for affordable smart homes is increasing**. econnecx™ offers **remote control, increased security, power savings (16.6% in one year)** and a solution that can **evolve with time** without the need for specialized contractors.

How many times have you found yourself at the furthest point away from home or office only to suddenly wonder "Did I shut the garage door?" "Did I set the Alarm" "Did I turn off the Heating, HWC etc. as you leave on Holiday" or "Will my home be warm or cool when I get home"?.

Econnecx solves all these problems while saving you time and money.

Tauranga

## INSTALL econnecx™ FROM \$2,400 + GST

### TYPICAL INSTALLATIONS RANGE FROM \$2,400 - \$3,000 + GST

Plus yearly subscription of \$80.00 + GST

A typical econnecx™ installation is completed by the on-site electrician and would allow phone app control and web-based scheduling of the following: 1-2 heat pumps, hot water cylinder, under tile heating, heated towel rails, night lights, entry lights, garage door, alarm and home/away mode.

econnecx™ is not limited to the above. Any one system can control 17 fittings/appliances. Then additional econnecx™ systems with the same capacity can be installed. There is no limit to the number of econnecx™ systems that can be installed
